

# Power

Revised Jan 2022:  
Removed barrel jack and reverse-polarity protection diode  
for 5V USB-B jack (should make it easier to find a PSU as well)

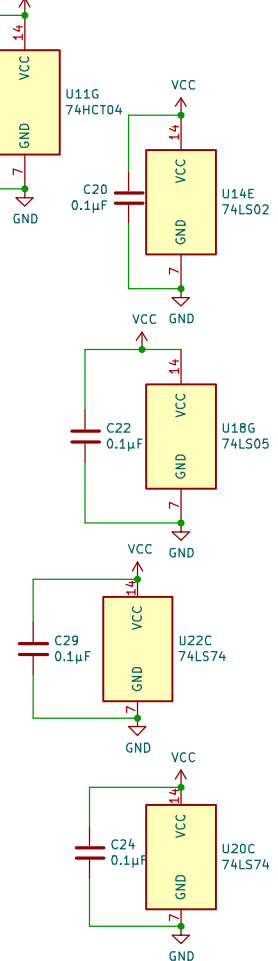

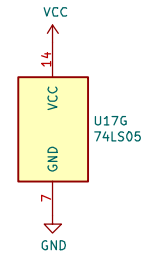

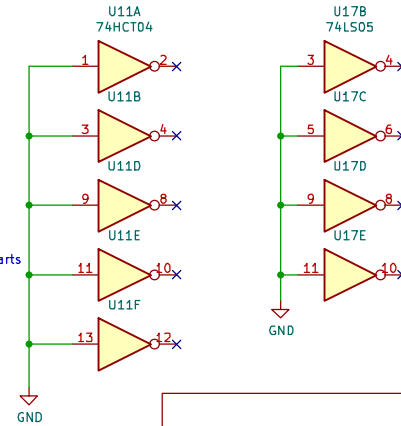

I dumped this entire mess and made an oscillator  
disperse directly to pin 11 of the new extra clock divider

this is about where U8 on the original schematic starts

Revised June 2020 – transistor and other clock shift stuff removed,  
CPU clock tied to audio clock

Sheet: /Power/
